

Jesus promised, "Anyone who believes in me, even though he dies like anyone else, shall live again. **He is given eternal life for believing in me** and shall never perish." - John 10:15-16 TLB

He also offers us a better life in the here and now. "My purpose is to give life in all its fullness." - John 10:10b TLB

This new life begins the moment we individually invite Jesus Christ into our hearts and lives, as Lord and Master, making us children of God who comes to live within us by the Holy Spirit.

So then, where is this caring, loving and merciful God in your life - on the inside or just on the outside? And if He isn't on the inside, wouldn't you like to pray right now and get Him in?

Here's How - Pray this model prayer aloud and from your heart:

"Father God, I come boldly before You in the name of Your Son Jesus. I ask You to reveal Yourself to me, come into my life, forgive my sins, cleanse me with Your blood, making me Your own special child, and write my name in Your Book of Life. Believing Jesus Christ died for me, and that You raised him from the dead, I now confess Jesus Christ to be the Lord and Master of my life. I command Satan to depart in Jesus' name. Lord, now give me Your promised free gift of eternal life, and fill me with Your Holy Spirit so I can follow and obey You. Cause me to know You personally, and to experience Your divine love and abundant life. I thank You for hearing and answering my prayer as You promised in your Word, the Bible, You would. Amen."

"And he himself has promised us this: eternal life." - 1 John 2:25 TLB

What Are Your Chances Of Winning It Big?

What Are Your Chances Of Winning It Big?

On March 21, 2003, a software engineer from Southern California played an Excalibur slot machine to line up three megabucks symbols, paying 39.7 million!

The "House" plays most games with what seems like a relatively small mathematical advantage in their favor. Their average "take" for all games on the strip was 6.03% in 2002. Your edge is the following information about which casino games are best and which are worst in terms of payouts and odds. The late minister Joseph R. Fahey was a mathematical genius and a skillful card-counter. He was eventually banned from casinos after winning tens of thousands of dollars, all of which he donated to the church to uphold his vow of poverty. The chances of winning (in terms of house advantage) at the following games are:

Slots & Video Poker - Slot machines pay out 90 - 96% of what they take in. Payouts on nickel machines are generally lower than on quarter through dollar machines.

Blackjack - Some of the best odds in the casino. The house's natural edge is between 3 and 5%, and a skilled player can narrow that to 0.5% using the best betting and playing combinations.

Baccarat - House advantage 1.17%; other players 1.63%

Craps - Also offers among the best odds for players; the house edge on a single "pass line" bet is only 1.4%. If the house offers "double odds", that advantage dips to a mere .61%

Pai Gow Poker - House has a slim advantage of 2.5%

Poker - Poker is more a game of skill than luck. The house makes its living from a "cut" - usually around 5% - off the top of each pot. In **Three Card Poker** the house maintains a 3.4 % edge.

Let It Ride - The house edge is 3.5% for the "basic" payouts, but on the game's "bonus" pay table, the house edge can be as high as 36.5%!

Roulette - The overall house edge is 5.6 percent, about the poorest table odds in town.

Roulette - The overall house edge is 5.6 percent, about the poorest table odds in town.

Keno - Similar to a lottery, simple to play, with a possible \$50,000 immediate payout on a \$1 bet; but among the lowest player odds in the house with a casino edge of 20 to 30 percent.

Sports Wagers - In 2001, according to the Nevada Gaming Control Board, Casinos pulled in \$2 billion, but pocketed only \$118 million, a winning margin of 6.5%. When you bet sports in Las Vegas, a fee will be deducted from your winnings - this is the "vig" or vigorish.

Sports Books - Horse racing is the largest spectator sport in the United States. A horse's previous performance or "form" is a good guide, and the simple bets - "win" or "place" - are the most profitable.

State Lotteries - In California, a participant's chances of winning the Super Lotto are 1 in 17 million, an improvement over the previous 1 in 23 million.

LIFE'S BEST BET!

What are your chances of making it to Heaven and living with God forever in the end? - **100%** if we meet God on His terms.

Dr. Ian Stevenson, a professor of Psychiatry, after 20 years of research on near death and life after death experiences, told Reader's Digest, "I think it prudent to prepare for the eventuality."

People are dying as usual, but, with modern medical resuscitation, some are living to tell about a very real human existence beyond the grave. In light of the research, the question is no longer "Will we spend eternity?", but rather, "Where will I spend eternity?"

When it comes to what matters most in life, where we will spend the most of it (with or without God), we shouldn't take chances or play games with our Creator.

Life's "best deal" is still being offered by God Himself, namely, **eternal life** (living forever in God's Paradise) as a **free gift**, complements of the death and resurrection of Jesus Christ for you!
